

ROME COLMENARES

Cloud / IT / Security — AWS • CompTIA Security+

Houston, TX • 281-330-4566 • romanaegis@gmail.com • romecolmenares.com • linkedin.com/in/rome-colmenares • github.com/romanaegis

PROFESSIONAL SUMMARY

Cloud and security professional with an Associate's in Cloud Computing and a CompTIA Security+ certification, backed by over two decades of operational, logistics, and training experience as a business owner in the airline pet-transport industry. Builds practical AWS serverless and AI-automation applications and brings proven leadership, clear communication, and calm-under-pressure problem-solving. Seeking an entry-level cloud, support, security (SOC), or developer role.

TECHNICAL SKILLS

Cloud / AWS: Lambda, S3, DynamoDB, Amplify, serverless architecture, cloud computing fundamentals

Security: CompTIA Security+, networking & security fundamentals, CIA triad, common attack vectors

Programming: Python, React + TypeScript, JavaScript; learning Golang

Tools & Platforms: Git & GitHub, Docker & containers (basics), Linux/Unix (basics), n8n automation

Professional: Instructional design (ATD), technical training, stakeholder communication, documentation, team leadership, operations & logistics

CERTIFICATIONS & EDUCATION

CompTIA Security+ December 2025

AWS Cloud Foundations November 2024

Associate of Applied Science, Cloud Computing — San Jacinto Community College, Houston, TX May 2026

In progress: AWS Certified Cloud Practitioner — next: AWS Solutions Architect Associate

PROJECTS

Weather Portfolio Application — React + TypeScript front end; romecolmenares.com

- Built and deployed a responsive web app integrating a live weather API, designed for clarity and a user-focused experience.
- Hosted on AWS Amplify using serverless patterns; source and documentation on GitHub.

Resume Tailoring Automator — full-stack AI automation; live demo on portfolio

- Built an n8n workflow that takes a job description and a resume and uses AI (Groq / Llama 3.3) to automatically tailor the resume to the role.
- Developed a React + TypeScript front end that calls the workflow via webhook (n8n hosted on Railway) and renders the tailored output in real time.

PROFESSIONAL EXPERIENCE

Owner — PetsOnTheGo, Houston, TX 1996 – 2023

- **Logistics & operations:** Owned and operated a pet transportation business for over two decades, coordinating live-animal shipments under strict safety standards and tight airline schedules — including United Airlines' PetSafe program, where my station achieved the lowest error rate by volume of any station handling the product.
- **Training & instruction:** Designed and delivered training on handling, safety, and compliance procedures, translating complex requirements into clear, actionable guidance for staff and partners.
- **Leadership & management:** Ran all aspects of the business — staffing, scheduling, client relationships, and process optimization — leading teams and resolving issues in real time in a high-pressure, results-oriented environment.
